	We are not only doctors. We are also musicians, painters, writers, sportsmen, magicians, in brief: human beings with lots of talents. For the very first time in the history of ICOMS, we will bring these creative OMF-colleagues on stage. In this plenary session, some of our colleagues will surprise us with their special gifts. We offer you an interactive program with powerful talks, music performed by the participants of the conference, joy, laughter and coming together. Professionals from all over the world will also share their best surgical tips and tricks with you. This is not about science or research; this is about tips and tricks for your daily practice. This session is an absolute must for every participant. Entrance is free. Since this is more a theater show than a scientific session, doors will be closed at 03.00 pm, so be on time and join us at the DET's it session!
